5

Restriction to one of the following inventions is required under 35 U.S.C. 121:

10

I. Claims 21-29, drawn to a method of determining the effectiveness of a food supplement fluorimetrically, classified in class 435, subclass 4.

II. Claims 30-36, drawn to a method of determining the effectiveness of a food supplement in vitro, classified in class 435, subclass 28.

15

The inventions are distinct, each from the other because:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01).

20

In the instant case the different inventions are distinct because the method steps are entirely different.

25

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5 Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
